- ▶ Mentholated formula provides soothing relief
- ▶ Aces Joint Repair is available in 2mL packets and in 8 oz. metal cans
- ▶ Much higher concentration of cannabinoids than similar products

Background Story

inSupply Labs was created in 2018 in Portland, Oregon when our founders, James and Kevin, decided to fill a gap that was created when the CBD industry was legalized at the end of 2018.

When inSupply Labs first started, purpose-built and industrial-scale equipment designed specifically for the hemp industry did not exist. So, James and Kevin decided to design and build their own state-of-the-art processing system. For this reason, inSupply uses predominantly pharmaceutical-grade stainless steel machinery all designed, engineered and fabricated at inSupply Labs' very own 25,000 square foot facility in Portland, Oregon.

Having perfected its cannabinoid processing systems, inSupply Labs is now taking the next step to introduce premium quality wellness products to the market, including Aces Joint Repair, with maximum strength CBD.

inSupply has now assembled a full team of engineers, chemists, botanists, processing professionals, production, sales and support staff to bring Aces Joint Repair to the public.

The inSupply Labs team is dedicated to making cannabinoid-based wellness available and affordable to all that want or need access to them.

Mission Statement

inSupply Lab's central purpose is to offer its customers a safe, effective alternative to prescription painkillers, other toxic prescription drugs and over-the-counter drugs that contain harsh chemical based and/or artificial compounds. We offer nature's perfect remedies: top quality, lab-tested, all-natural cannabinoid-based alternatives at affordable pricing. Whether you're new to CBD or have been using it for years, you can count on inSupply Labs to provide cannabinoid products with the purest ingredients. Each batch is carefully tested to ensure quality, consistency and authenticity. Overall, our goal is to create top quality, premium products at an affordable price for all.

ACES

*JOINT REPAIR™

MENTHOLATED
RUB

“We have taken industrial hemp derived CBD and combined it with other ethically and sustainably sourced botanicals and all natural ingredients to produce Aces Joint Repair - a product that will allow people to harness the healing power of cannabinoids.”

Business Model Objectives

• Build the leading cannabinoid-based product manufacturing facility in the country's largest and most competitive market.

• Dominate the branded products space by leveraging data to grow our portfolio of brands both organically and through acquisitions.

• Use knowledge from scaling in Oregon to enter new markets with proven products and brands.

• Pair disciplined agile food manufacturing with thoughtful branding teams.

Competitive Advantages

InSupply is a leader in branded CBD/CBG/CBN distillate extracts in Oregon and is well positioned to own the branded products space in hemp products regionally, nationally and internationally.

By owning and maintaining a cannabinoid production facility and machine fabrication company, inSupply can source raw materials, develop processing machinery, process cannabinoids and create infused products better, faster and more efficiently than its competitors.

inSupply's commitment to quality will be evident in its state-of-the-art processing equipment and efficient production techniques and in its carefully formulated products using only the finest ingredients to join with the purest cannabinoids.

Distribution Channels

In-Store Sales

- ▶ Aces Joint Repair will be available in discerning retailers throughout the country.

E-Commerce

- ▶ Aces Joint Repair is available for purchase online at [AcesJointRepair.com](https://www.AcesJointRepair.com).

inSupply is prepared to grow as the hemp industry grows. We will continue to develop state-of-the-art techniques to maximize our cannabinoid extraction methods. The Company will stay ahead of the curve by designing and building new equipment for processing hemp and isolating cannabinoid compounds. Our engineers and machinists will continue to take our design visions to create stainless steel machines that are unrivaled in efficiency and quality.

The Company expects the hemp industry to continue its explosive growth. Increasing application usage in personal care, food & beverage, textile and bio composite industries is projected to drive industrial hemp market size. Rise in hemp oil demand on account of high essential fatty acid content that prevents and alleviates ailments are the factors contributing to industry growth from the food & beverage sector. The global food & beverage market size was valued at over \$1 trillion in 2019. Shifts in consumer sociological and health trends towards healthy foods, improving personal health and an ever growing elderly population will boost industry growth.

inSupply Labs has the infrastructure to build out their existing facilities and attract highly skilled labor as the business expands. Staying local also gives inSupply Labs the opportunity to work with a number of hemp farmers who surround the Portland area, including family-owned growers throughout Oregon and Washington.

inSupply Labs looks forward to a mutually prosperous and profitable future with its customers in the burgeoning hemp industry - truly a growth business.
